

## Subcommittee Energy and Water Development

Project Title	Request	Intended Recipient	Project Location	Description
Fossil Energy Research and Development, Cooperative Research and Development program.	\$10,000,000	Western Research Institute and University of North Dakota Energy and Environmental Research Center	Laramie, Wyoming and Grand Forks, North Dakota	The Cooperative Research program was established to stimulate research in support of the mission of the U.S. Department of Energy, Office of Fossil Energy. The program is a multi-year, high risk research initiative to develop technologies and applications that can be utilized to deliver energy in a more efficient and effective manner. This includes a focus on development of carbon dioxide reuse and recycle technologies to avoid the parasitic energy cost of carbon dioxide compression for underground sequestration
